

Client Onboarding Checklist

Best practice guide for onboarding new client accounts

This checklist outlines the standard steps for properly onboarding a new client, from initial consultation through to the first logged service request. Following this process ensures consistent, high-quality client service across all consultants.

Stage 1: Initial Consultation

- Schedule an introductory meeting with the prospective client
- Gather basic company information (industry, size, primary contact)
- Identify the client's key business challenges or service needs
- Determine whether KMP's service offerings are a good fit

Stage 2: Client Registration

- Create the client profile in the Client Management module
- Record complete contact details (email, contact number, address)
- Assign the appropriate industry classification
- Verify all information for accuracy before saving

Stage 3: Service Request Setup

- Log the client's initial service request with a clear title and details
- Identify and tag the required skill/expertise for the request
- Route the request through Resource Matching for staff assignment
- Confirm the assigned consultant has reviewed the request details

Stage 4: Engagement Kickoff

- Prepare the SOW using the standard SOW Template
- Issue the Consultancy Service Agreement and, if applicable, the NDA
- Schedule a kickoff meeting between the assigned consultant and client
- Set expectations on communication channels and reporting frequency

Stage 5: Ongoing Relationship Management

- Monitor service request status and update the client periodically
- Log all client interactions and service history in the system

- Conduct a post-engagement review upon completion
- Identify opportunities for future engagements
